Supported Devices

StayAtHand is available for iOS devices (iPhone, iPad, iPod Touch, iPad mini). If used for the iPad it must be searched for as an iPhone app, not an iPad app. It looks beautiful on the iPad.

StayFaster is a responsive website which means it looks great on PCs, laptops, tablets and phones. It works well on Android phones.

Inventory

We are currently selling only US-based hotels (all 50 states and DC; not Puerto Rico, US Virgin Islands, or Guam). We anticipate expanding internationally later in 2015. We sell all of the major brands and nearly every hotel sold by Expedia and Priceline, or any of the companies they own (e.g. Booking.com, Kayak). We sell some hotels they don't.

Terms & Conditions
